Yes!Chef is a web application that allows you to store your favorite recipes all in one place. Create a login and start your collection of recipes!

FriendIndeed - http://friendindeed.herokuapp.com
HTML5/CSS3 | SASS | Bootstrap | Responsive | Ruby on Rails | PostgreSQL | Bootstrap
FriendIndeed is a web application that spreads positivity through acts of kindness. Utilizes Facebook API to log in, share, and connect with others.

Work Experience

Reactor Labs, LLC - UI Developer
(April 2015 - Present)

Private Internet Access - Marketing/Operations Manager
(May 2013 - October 2014)

Business development - Screened incoming business opportunities and prospected for new relationships by networking, creating decks with senior executives as necessary.

Affiliates - Recruited new affiliates, reengaged inactive affiliates, and deepened relationship with existing affiliates. In addition, tracked affiliate performance and generated reports on a monthly basis.

Advertising - Searched for new opportunities, liaised between vendor and senior executives, and monitored the effectiveness of existing campaigns.

Internal Operations - Managed day-to-day processing of accounts payable using Quickbooks and administered payroll for nonexempt employees, including tabulation of accrued benefits for all employees.

Customer Service - Monitored team to ensure superior customer service, resolved escalations through active listening, improved customer service response macros, and maintained social media (Facebook, Twitter, Google+, and Reddit).

Louis Vuitton - Operations Specialist/Service Associate
(May 2010 - May 2013)

Education

Purdue University – Krannert School of Management, West Lafayette, IN
Bachelor of Science in Management
